Education

Engineering College Of Bikaner

Sep 2021 – Jun 2025

B.Tech in Computer Science & Technology (CGPA: 8.40)

Bikaner, Rajasthan

Experience

Software Engineer Intern

Nov 2024 – Jan 2025

CodeClause

Remote

- Created and deployed a fully responsive blog website using HTML5, CSS, Bootstrap, and JavaScript.
- Developed core features such as commenting system, dynamic post filtering, and responsive UI design.
- Collaborated with a remote team and followed agile practices, improving teamwork and timely project delivery.

Frontend Developer Intern

Feb 2025 – Apr 2025

ONGC

Dehradun

- Built a responsive weather web app using React and Google Weather API for real-time updates.
- Displayed dynamic temperature, conditions, and location data with interactive weather icons.
- Documented the process and optimized API integration for faster load times and better stability.

Projects

SoulVibes (Dating App with Real-Time Chat) | MERN Stack, JWT, bcrypt, Socket.io | 🐙 GitHub Jan 2025 – Present

- Built a Tinder-style dating application with secure JWT authentication and bcrypt password hashing.
- Implemented Signup, Login, and Profile Setup including name, age, gender, photo, and bio.
- Created a Feed system showing one profile at a time with Interested/Ignore functionality and no duplicate users.
- Developed full Requests and Connections module for sending, accepting, and rejecting connection requests.
- Integrated **real-time one-to-one chat** using Socket.io for instant messaging between matched users.
- Built chat features like message live updates, auto-scroll, and online/offline user indicators.
- Designed MongoDB collections: Users, Requests, and Messages for optimized data handling.
- Implemented logout, validation, error handling, and fully responsive UI.

NetflixGPT | React.js, Redux, Tailwind CSS, HTML, Firebase, OpenAI API, TMDb API | 🐙 GitHub Jun 2025 – Present

- Built a responsive Netflix-like streaming UI using React.js and Tailwind CSS for better user experience.
- Integrated TMDb API to fetch trending movies/TV shows with posters, ratings, and trailers.
- Implemented secure Firebase authentication for user login and signup flow.
- Added AI-powered semantic search using OpenAI API for smarter movie discovery.

Namaste Food | React.js, Redux, Tailwind CSS, HTML, Swiggy API | 🐙 GitHub

Feb 2025 – Jun 2025

- Developed an online food ordering platform with React.js for browsing and ordering meals.
- Integrated Swiggy API for real-time restaurant data and dynamic menu display.
- Implemented useful features like search, menu display, and cart management system.
- Enhanced user experience with responsive layouts and smooth multi-page navigation.
- Added proper error handling and optimized loading states to improve overall reliability.

Skills

Languages: JavaScript, C++, HTML, CSS, C programming

Frontend: React.js, Redux, Tailwind CSS, Bootstrap, JQuery

Backend: Node.js, Express.js, REST API

Database: MySQL, mongoDB

Core Concepts: OOPs, Data Structures and Algorithms

Other Tools: Git, GitHub, Postman, Version Control
