2018 - 2023

College/University

Mahaveer Institute of Science and Technology

PROJECT DETAILS

Project Name: Interview Application

23 September 2023 – 20 May 2024

Project Role: Front-End Developer

Description:

Developed an interactive web-based application to streamline the recruitment process. The project enables candidates to apply for positions, take online assessments, and track their application status. It also provides HR personnel with tools to review applications, schedule interviews, and manage candidate feedback. Built using React, Node.js with a responsive UI and secure authentication system.

Responsibilities:

- Developed an Application for Interview Process.
- Frontend Technology used for better User Interface.
- Responsible for providing creation of Components and Modules.
- User-Friendly Interface: Intuitive design that simplifies navigation for both candidates and hiring teams.
- Easily track applications, resumes, and candidate statuses in one centralized platform.
- Analytics and Reporting: Generate insights on hiring trends, candidate performance, and process efficiency to inform future recruitment strategies.
- Ensures data privacy and secure messaging between candidates and hiring teams.
- Mobile Accessibility: Available on multiple devices, allowing for flexibility in scheduling and communication.

Technologies: React JS, React Redux, Material UI, React Spectrum, PHP, Git.

=====

Project Name: Chola Ekyc Admin

1st June 2024 – 30th July 2025

Project Role: Front-End Developer

Description:

The **Chola eKYC Admin** system is designed to efficiently manage the online Demat account opening process. Its primary objective is to monitor and maintain all stages of client onboarding, including the number of accounts opened, and the status of each application—approved, rejected, or pending. The platform provides comprehensive client details, which are securely maintained and accessible only to the administrator. The admin has the authority to approve or reject applications, with clear reasons communicated in case of rejections.

Responsibilities:

- Responsible for understanding the requirements, designing and development of the application.
- Involved in Developing CRUD operations.
- Creating Restful Services and testing Web API's using Postman.
- Involved in the enhancement of the applications by the changes in the front end of the application.
- Responsible for delivering the project related deliverables on time.

Technologies: HTML, CSS, JavaScript, React JS, Core Web API, SQL Server, JQuery Ajax, Bootstrap, My SQL, GitHub

Tools: VS Code, Postman, Oracle

Project Name: Adithya Birla Capital

1st August 2025 – Present

Project Role: Front-End Developer

Description:

The **Aditya Birla Capital** online Demat account system simplifies and secures the account opening process through a structured 7-step workflow: Address, Bank, Personal, Exchange Details, IPV, PDF Generation, and E-Sign. Clients can fill in details and upload documents step by step with ease. The platform ensures safety, provides clear guidance at each stage, and handles exceptions effectively to deliver a smooth, user-friendly experience.

Responsibilities:

- Played an active role in all stages – requirement gathering, design, development, debugging.
- Frontend Technology used for better User Interface.
- Responsible for providing creation of Components and Modules.
- Responsible for delivering the project related deliverables on time.

Technologies: HTML, CSS, TypeScript, Angular JS, Web API, Shadcn UI, Bootstrap CSS, My SQL, Github

Tools: VS Code, Postman, Oracle
