Education

Dr. A.P.J. Abdul Kalam Technical University

Aug 2024

Bachelor of Technology in Computer Science and Engineering(GPA: 7.9 / 10.00)

Lucknow, Uttar Pradesh

D.S. Memorial Inter College Suhwan Ratsar Ballia

May 2020

Senior Secondary (XII)

Ballia, Uttar Pradesh

Experience

Mindsutra Software Technologies

June 2025 – Present

Full Stack Developer

New Delhi

- Developed and maintained visually appealing, user-friendly web pages and applications for a hotel room booking management system, focusing primarily on frontend development using react and tailwind css.
- Collaborated with a team of developers to create a comprehensive inventory section within the booking system, integrating frontend design with backend functionality.
- Worked extensively on the frontend, delivering multiple website interfaces and ensuring seamless user experience across various devices.

Projects

CodeShiksha | MongoDB, Express.js, React.js, Node.js, Redux, JWT, Razorpay, Cloudinary, Tailwind CSS

[Project Link](#)

- Developed a full-stack Ed-Tech platform using the MERN stack enabling students to enroll, consume, and rate courses, and instructors to create and manage content.
- Designed and implemented RESTful APIs for authentication, course management, ratings, and payments.
- Implemented JWT-based authentication with OTP verification and password reset functionality.
- Integrated Razorpay payment gateway for secure course purchases and enrollment workflow.
- Used Cloudinary for cloud-based media storage and optimized content delivery.
- Followed MVC architecture and REST principles to ensure scalable and maintainable code structure.

Book Hub | MongoDB, Express.js, React.js, Node.js

[Project Link](#)

- Developed a book e-commerce app using the MERN stack, enabling users to create accounts, browse books, and manage their shopping cart.
- Implemented user authentication for secure sign-ups and logins, with full cart functionality (add, remove, and view items).
- Integrated order management features, allowing users to place, view, and track orders using MongoDB for data storage.

Auth App | MongoDB, Express.js, React.js, Node.js

[Project Link](#)

- Developed a role-based authentication app using MERN stack, with three user roles (Admin, User, Guest) and custom dashboards.
- Implemented JWT authentication to secure user login and access based on roles.
- Created role-specific dashboards using React.js and stored user data in MongoDB.

Technical Skills

Languages: Java, JavaScript

Web Back-End Tools & Technologies: Node.js, Express.js

Web Front-End Tools & Technologies: React.js, HTML5, CSS3, Tailwind CSS

Database: MongoDB, SQL

Concepts: Data Structure, Algorithm Designing, OOPS (Object Oriented Programming Structure)

Cloud Technologies: Vercel, Cloudinary

Soft Skills: Communication, Leadership
