SUMMARY

Full Stack Software Engineer with experience in building scalable web and mobile applications using React.js, Next.js, React Native, and Django. Skilled in REST API development, database optimization, and performance enhancement. Passionate about building efficient, user-centric, and production-ready systems.

SKILLS

Programming Languages: Python, Java, JavaScript
Frontend Development: React.js, Next.js, React Native, HTML5, CSS3
Backend Development: Django, RESTful APIs
Database Management: MySQL, SQL
Styling & UI: Tailwind CSS, Bootstrap
API Integration: REST APIs, Fetch API
Testing: Unit Testing, Smoke Testing, Sanity Testing
Version Control: Git, GitHub, GitLab
Tools: Postman, Figma

WORK EXPERIENCE

Melorra (D2C E-Commerce)

Nov 2024 – Present

Software Engineer

Bangalore, Karnataka

- Designed and developed responsive, user-centric web and mobile interfaces using **Next.js** for frontend and **React Native** for Android applications, ensuring seamless and consistent experiences across multiple devices and screen sizes.
- Built and maintained backend services using **Python Django**, implementing secure, scalable, and efficient API endpoints to support both web and mobile applications.
- Collaborated with UI/UX designers to translate wireframes and design concepts into intuitive, visually appealing, and user-friendly interfaces.
- Integrated **RESTful APIs** between frontend and backend systems, improving data flow, performance, and user interactions.
- Managed and optimized **MySQL databases**, including schema design, query performance improvements, and seamless integration with Django ORM.
- Developed automation scripts using **JavaScript** to streamline repetitive tasks such as data handling, deployment workflows, and system monitoring, reducing manual effort and improving efficiency.
- Participated in code reviews, debugging sessions, sprint planning, and daily stand-ups as part of an agile development workflow to improve collaboration and maintain code quality.
- Conducted testing and troubleshooting of frontend and backend systems, identifying and resolving bugs to ensure smooth and reliable application performance.
- Improved overall application efficiency by optimizing code structure, tuning database queries, and reducing unnecessary re-renders in frontend components.

PROJECTS

Portfolio Website

HTML, CSS, JavaScript, React

- Developed a personal portfolio website to showcase technical skills, projects, and professional experience in a structured and interactive format.
- Implemented a fully responsive design ensuring optimized viewing across desktop and mobile devices.

- Built interactive project sections featuring images, descriptions, and repository links.
- Designed an engaging “About” section highlighting background, skills, and professional values.

Netflix Clone

HTML, CSS, JavaScript

- Built a frontend web application replicating Netflix’s modern and sleek user interface.
- Implemented a dark-themed UI with interactive hover effects and dynamic content sections.
- Developed categorized rows such as Trending Now, Top Picks, and New Releases.
- Created an engaging hero section with auto-playing trailers and featured content.

Bio Data Maker

HTML, CSS, JavaScript, React

- Developed a web application to generate professional resumes through a structured form-based interface.
- Implemented real-time preview functionality allowing users to visualize updates instantly.
- Integrated PDF generation feature enabling users to download formatted bio data documents.

EDUCATION

Meerut Institute of Technology

Bachelor of Technology (B.Tech), Computer Science and Engineering
