| Jan 2025 - Present  | <p>( Full Stack Developer )</p> <p>Sourcery IT, Sector 63, Noida</p> <ul style="list-style-type: none"><li>• Developed a full-stack web application using the MERN stack (React.js, Node.js), with foundational knowledge of AWS services for deployment and scalability.</li><li>• Built responsive and dynamic user interfaces using React.js, and implemented server-side logic with Node.js.</li><li>• Implemented Role-Based Access Control in the admin panel to ensure secure data handling and user-specific access permissions.</li><li>• Designed and developed secure backend APIs for core modules such as authentication and data management, ensuring reliability and scalability.</li><li>• Gained working knowledge of React Native for mobile application development.</li></ul> |
| Jun 2024 - Nov 2024 | <p>( Web Development Internship )</p> <p>Code Apha</p> <ul style="list-style-type: none"><li>• Seeking growth through hands-on web development internship. With solid coding skills and a passion for innovation, we bring a dedicated work ethic and a hunger to learn.</li><li>• Learned end-to-end web development processes including frontend and backend.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                         |

## PROJECTS

- MVP Cross-Border Payment Platform (Rapyd Integration) ( React.js, React Native, Node.js, PostgreSQL )**
- Developed an MVP payment system enabling international transfers (USA–Uganda–China).
  - Built full-stack architecture with web and mobile applications.
  - Integrated Rapyd APIs for wallet creation, payments, and payouts.
  - Implemented KYC, 2FA, and webhook-based real-time transaction updates.
  - Designed secure backend APIs for handling payment workflows.
- Kanban App ( React.js, React Native, Node.js, SQL )**
- Built a role-based Kanban inventory system with React Native (mobile) and React.js (web).
  - Implemented QR-based part scanning with duplicate prevention and validation logic.
  - Developed APIs and admin dashboard for real-time inventory tracking and history management.
  - Reduced manual errors and improved dispatch accuracy through automated validation.

**FixandFurnish LLP ( Next.js, Node js, Tailwind CSS, SQL )**

- Built responsive web app with role-based dashboards (Admin, Seller, Technician).
- Developed React Native app for Technician workflow.
- Implemented backend features for service requests and tracking.
- Integrated WhatsApp OTP verification.
- Automated lead assignment and workflows

**FIFO ( React.js,React Native, Node.js, SQL)**

- Developed and maintained a live full-stack application using React.js, React Native, Node.js, and Tailwind CSS.
- Built responsive web and mobile interfaces; collaborated with clients for requirement-based updates.
- Automated inventory entry via email parsing and cron jobs.
- Developed APIs for inventory updates and request workflows.
- Improved inventory accuracy and reduced manual effort.

**Snake and Ladder Game ( React.js, Node.js, MongoDB )**

- Built on training our responsive react.js frontend for Snake and Ladder Game role-based players.
- In Backend we are to be use the node.js.
- In this game the player are to be play the game with computer and friend also after send the game request both are to be connect and play the game.

**EDUCATION**

|                 |                                                                                                                                                                   |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2024 - Pursuing | <b>Master of Business Administration (MBA)</b><br>Meerut Institute of Engineering and Technology<br>Specialization: Internatonal Business, Information Technology |
| 2019-23         | <b>Bachelor of Technology (B.Tech)</b><br>Dewan VS Group of Institute of Engineering and Technology<br>Specialization: Computer Science and Engineering           |

**STRENGTHS**

|                         |                                  |                          |                 |                  |
|-------------------------|----------------------------------|--------------------------|-----------------|------------------|
| Self Motivated Teamwork | Active Listening Problem Solving | Creative Thinking Skills | Decision Making | Technical Skills |
|-------------------------|----------------------------------|--------------------------|-----------------|------------------|

**ACHIEVEMENTS & AWARDS**

|                                        |
|----------------------------------------|
| Full Stack Developer from Udemy        |
| React Js Development from Udemy        |
| Developing Soft Skills and Personality |

**DECLARATION**

|                                                                                                                      |
|----------------------------------------------------------------------------------------------------------------------|
| Hereby declare that all the information mentioned above is true and complete to the best of my knowledge and beleif. |
