## SUMMARY

---

Passionate Web Developer with a strong background in building efficient and scalable web applications. Proficient in Tech-stack, such as HTML, CSS, and JavaScript, React-Js, bootstrap, MongoDB, Typescript, Express.js, Node JS, Tailwindcss, Next.js. Passionate about staying updated with the latest trends and best practices in Web development.

## EDUCATION

---

**Bachelor of Technology (CSE)**, VBSPU University 2021-2025  
CGPA - 8.1

**Senior Secondary**, Dafoodils public school 2020-2021  
Percentage - 81.5

## SKILLS

---

**Technical Skills**    React.js, JavaScript, HTML, CSS, MongoDB, Bootstrap, Express.js, Node.js, Next.js, TypeScript

**Tools**    VS Code, Postman, Git, GitHub

## EXPERIENCE

---

**MERN Stack Apprentice** Aug 2025 - Jan 2026  
Techpile Technology Lucknow, UP

- Completed a 6-month hands-on MERN Stack apprenticeship, focused on building real-world web applications.
- Worked with Frontend and backend tech-stack to develop responsive and scalable applications.
- Applied component-based architecture, state management, industry best practices for clean, maintainable code.
- Explored Next.js and TypeScript to build scalable, performant, and type-safe applications.
- Strengthened debugging, optimization, and version control skills using Git and GitHub in real-world scenarios.

**Software Developer Intern** Mar 2025 – May 2025  
Lean IT India Pvt. Ltd

- Worked on frontend development tasks using React.js and JavaScript (ES6+)
- Applied component-based architecture and debugging techniques
- Collaborated in an agile environment and followed professional development practices.

## PROJECTS

---

**Food Ordering Platform.** Developed a responsive food ordering platform using React.js and Tailwind CSS. Implemented Redux Toolkit for real-time cart operations (add/remove items, quantity control). Integrated search and category-based filtering for efficient menu navigation. ([project link](#))

**Gym Website (Frontend and Backend Integration)** Built a responsive gym website using React.js and CSS. Added basic backend integration with Express.js for handling form submissions and email notifications using Nodemailer. Cors to allow secure frontend-backend communication.

**ZigoConnect – Communication Platform** Developed a real-time communication web application using React.js and CSS, integrated with ZegoCloud for seamless audio and video calling functionality and other controls functionality such as mute, camera toggle, and screen sharing. ([project link](#))

**Task-Track-Manager** Developed a full-stack task management application using React.js, Node.js, and Express.js with secure user authentication and protected APIs. Implemented CRUD operations for task handling along with file upload functionality and integrated MongoDB for efficient data storage and management. ([project link](#))

## EXTRA-CURRICULAR ACTIVITIES

---

- Participated in college technical events and workshops related to web development..
  - Volunteered in college activities, gaining teamwork and coordination experience
-
