PROJECTS

Shopping cart

- Developed a feature-rich Shopping Cart application using React.js with functionalities like Add to Cart.
- Implemented global state management using Context API (and useReducer) for efficient handling of cart data across components.
- Integrated search functionality and reusable components to enhance scalability, code reusability, and user experience.
- Built a fully responsive and user-friendly interface with React Router for seamless navigation across multiple pages

11/2025

Portfolio

- Developed a responsive personal portfolio website using React.js to showcase projects, skills, and contact information.
- Implemented reusable components and modern UI design for better user experience and maintainability.
- Integrated routing using React Router for seamless navigation between different sections (Home, Projects, Contact).
- Optimized performance and ensured mobile responsiveness using CSS and best frontend practices
