📁 PROFESSIONAL EXPERIENCE

Infograins Software Solutions

Reactjs Intern

11/2023 – 01/2024 | Indore

- I joined this company as a React.js intern, honed my skills in HTML, CSS and Javascript, and subsequently applied my knowledge to various projects, including a portfolio website, LARQ clone website, and several others.

Zithas Technologies Pvt. Ltd

Software Developer Intern

02/2024 – 04/2024 | Vadodara

- Mars Website: Utilized the pre-existing calendar feature from the Stoke theme and digital clock from material UI to integrate it into the Mars website, then customized and enhanced its functionality based on guidance from the senior developer.

Stack Infinite Private Limited

Frontend developer

06/2024 – 11/2025 | Indore

- Stack Infinite Website: Collaborated with a team to build the company website from scratch using Vite.js and Tailwind CSS, creating dynamic components, custom themes, and optimizing the frontend for performance, responsiveness, and scalability.
- Gogo Motor Website: Worked on the GoGo Motor website to improve speed and performance by compressing images, removing unused code, lazy loading content, and using React hooks like useMemo and useCallback to avoid unnecessary re- renders and make the site faster.
- Vision Intelligence Blackhat: Worked on the multilingual feature of a service management platform for Admins, Merchants, and Customers, supporting English and Arabic. The platform offers services like doctor consultations, plumbing, and car repairs, allowing users to book professionals, track services, and get timely support.

📁 PROJECTS

E-commerce Website

- Developed an e-commerce website using HTML, Tailwind CSS, JavaScript, and Next.js, featuring dynamic product listings with pagination, a detailed product page, and a responsive cart sidebar. Users can add products, adjust quantities, and remove items, with all data seamlessly fetched from an API.
