Professional Summary

Backend Developer skilled in Java, SQL, and MySQL, experienced in building server-side applications and RESTful APIs. Strong in OOP concepts, database design, and CRUD operations, seeking opportunities as a Java / Backend Developer

Skills

Languages: JAVA, SQL, Object-Oriented Programming (OOP).

Frontend-Tech: HTML, CSS, JavaScript, React.js(basics).

Databases: SQL, MySQL, MongoDB.

Technologies: JDBC, Servlets, JSP, REST API, Hibernate, Spring Boot.

Tools & Technologies: Git, GitHub, Postman, IntelliJ IDEA.

Personal Projects

Car Management System:

Technologies: Java, MySQL, Postman, HTML, CSS, JavaScript.

- Built a full-stack application to manage car details using HTML, CSS, JavaScript, Java, and MySQL.
- Implemented CRUD operations (Create, Read, Update, Delete) to add, view, edit, and remove car features.
- Designed a user-friendly interface and integrated backend with a database for efficient data storage and retrieval.

Employee Management System:

Technologies: Java, JDBC, Servlets, JSP, MySQL, HTML, CSS

- Developed a Banking Application with core modules like user registration, login, deposit, withdrawal, and transaction tracking.
- Used Java Servlets and JDBC to establish secure and efficient communication between the frontend and MySQL database.
- Designed responsive user interfaces using HTML, CSS, and JSP, ensuring smooth customer interactions with banking services
- Applied ACID principles and implemented strong input validation to ensure secure and consistent transaction operations.

Education

B. Tech in Computer Science and Engineering,

Jawaharlal Nehru Technological University

Oct 2022 – May 2025

Hyderabad, India
