Projects

89 Days

Tour and travel management system

when I was in final year of my b.tech I have worked on "tour and travel management system ". we have used html, css , JavaScript for front-end, and php for the backend, for server we have used xhamp server. in our project we provide food facilities, ticket facilities and many more.

10 Days

Fitclub Landing Page Design

Designed and developed a dynamic landing page for Fitclub, focusing on user engagement and interactivity. The page features seamless navigation for program exploration, an intuitive class booking system, and clear membership pricing information. Successfully integrated interactive elements to enhance user experience and drive conversions.

3 Months

HRMS

HRMS tool — employee management module
Developed an HRMS (Human Resource Management System) module to streamline employee onboarding. Implemented an ‘Add New Employee’ feature with a structured form for data entry, image upload, and document upload, ensuring efficient record management. Applied logic similar to the department section for seamless integration. Built using HTML, CSS, JavaScript, and React (basic) to enhance functionality and user experience.

COURSES & CERTIFICATIONS
