

Abhishek Maurya

.NET Full Stack Developer

6387502106 @mauryaabhi3677@gmail.com https://www.linkedin.com/in/abhishek-maurya-2681021a1/ Lucknow,India

SUMMARY

.NET Full Stack Developer with 3+ years of experience, primarily in ASP.NET Core, .NET Core, and React.js. Skilled in building scalable web applications using C#, MVC/Web API architecture, Entity Framework Core, LINQ, and RESTful API development, with a strong focus on performance optimization, dependency injection, and clean architecture principles. Also experienced in SQL Server, advanced SQL query optimization, and deploying secure, high-performance backend services, along with crafting responsive, user-friendly interfaces.

SKILLS

.NET Core		.NET Core MVC		NET Core Web API		React JS		SQL Server		RESTful API	
Entity Framework Core			C#	Java	JavaScript		ES6+	HTML	Redux	Bootstrap	Tailwind CSS
LINQ	GitHub	Postman	CSS	React Hooks		Dependency Injection			Solid Principles		
JWT Authorization and Authentication					OOPs	MS Azure					

EXPERIENCE

.NET Full Stack Developer

Wipro Technology Limited

03/2025 - 09/2025 Pune, India

A leading global information technology, consulting and business process services company

- Developed scalable .NET Core Web APIs using C#, Entity Framework Core, LINQ, and SQL Server for enterprise banking applications
- Built responsive and reusable React.js UI components using HTML, CSS, and JavaScript, integrating RESTful APIs
- Applied SOLID principles and N-tier architecture to ensure maintainable and scalable codebases
- Optimized SQL queries and improved API performance through efficient data access and debugging
- Used Git for version control, participated in code reviews, and followed CI/CD pipelines for deployments

.NET Full Stack Developer

Seek Solution LLP

10/2022 - 10/2024 Lucknow, India

A tech solutions provider focusing on web and software development

- Designed and developed full-stack web applications using React.js, .NET Core Web API, C#, and SQL Server
- Created and consumed RESTful APIs, implemented business logic, and managed database operations using dependency injection and EF Core
- Implemented authentication and authorization mechanisms for secure application access
- Optimized SQL queries and enhanced application performance and response time
- Built responsive UI screens, performed API testing using Postman, and resolved production bugs
- Followed clean coding standards, reusable component patterns, and debugging best practices

EDUCATION

Bachelor of Technology (B.Tech)

IIMT College of Engineering

08/2018 - 05/2022 Greater Noida

PROJECTS

Postmortem-Shala

📅 10/2022 - 10/2024 📍 Lucknow, India

Online Learning Platform for IT Students & Working Professionals

- Developed a scalable e-learning platform using React.js, .NET Core Web API, and SQL Server
 - Built and integrated RESTful APIs, implemented Entity Framework Core, and optimized SQL queries
 - Implemented authentication & authorization and followed SOLID principles for clean architecture
 - Focused on performance optimization, responsive UI design, and end-to-end feature delivery
-

Ace Micromatic – Payroll Increment Management System

📅 2022 - 2023 📍 Location

Ace Micromatic is a manufacturing company with diverse employees including field officers, sales personnel, engineers, and chartered accountants.

A system was built using React and Node.js to automatically calculate salary increments based on predefined matrices and target achievements.

The increment process considers multiple factors such as incentive performance, educational qualifications, location, functional role, and experience slabs.

HSBC

📅 03/2025 - 09/2025 📍 Pune, India

Confidential project for enterprise banking applications
