Problem Solving, Team Collaboration, Communication, Time Management, Adaptability, Critical Thinking, Code Review, Agile Methodology, Project Planning, Debugging & Troubleshooting

PROFESSIONAL EXPERIENCE

Frontend Developer — Duplex Technology, Lucknow

November 2024 - December 2025

- Developed and maintained scalable, responsive web interfaces using HTML, CSS, Bootstrap, and React.js.
- Converted Figma designs into efficient, cross-browser compatible front-end code.
- Integrated new modules and optimized component performance to enhance page speed and SEO rankings.
- Ensured clean code practices, version control management, and efficient communication between design and development teams.

MERN Stack Developer Intern — Hanumant Technology Pvt. Ltd.

January 2024 - July 2024 (6 Months Internship)

- Developed and maintained full-stack web applications using React.js, Node.js, Express.js, and SQL.
- Collaborated on RESTful API development and integration in agile environments.
- Worked on debugging and deployment to ensure high application reliability across environments.
- Completed a six-month internship with certification and hands-on project exposure.

KEY PROJECTS

POSKing — Point of Sale & Inventory Management System (Retail ERP)

- Engineered a full-stack retail ERP solution for small and medium businesses with real-time POS transactions, accurate billing, and sales tracking.
- Implemented automated inventory management with live stock updates to prevent overstocking and shortages.
- Designed role-based authentication and authorization using secure login flows for admins and employees.
- Built a responsive, user-friendly interface using React.js for seamless daily operations and improved productivity.

E-Commerce Web Application

- Developed a dynamic e-commerce web application using pure JavaScript with client-side data management and persistent state handling via local storage.
- Built core features including product listing, cart management, and checkout workflows for a seamless shopping experience.
- Integrated external APIs to fetch and display dynamic product data, improving scalability and real-time updates.

Gangotri Travels — Travel Booking Website

- Designed and developed a fully responsive travel booking website with a clean and user-friendly interface.
- Built reusable and modular UI components using React.js to improve code maintainability and scalability.
- Optimized frontend performance and ensured cross-browser compatibility across modern browsers and devices.

Rathi Hospital — Healthcare Website

- Developed a fully responsive hospital website with an intuitive layout to enhance patient and visitor experience.
- Improved user accessibility and on-page SEO through semantic HTML and optimized page structure.
- Enhanced navigation flow and user engagement by designing a clean, optimized UI.
