EDUCATION

JC Bose University

Bachelor of Technology in Artificial Intelligence and Machine Learning

Faridabad, haryana

2022 – 2026

Rawal International School

Non-Medical with Computer Science

Faridabad, Haryana

2018-2022

EXPERIENCE

Codsoft - WebDevelopment Intern

Remote

Web development Internship

2024

- Developed and maintained responsive web applications using HTML5, CSS3, JavaScript, and React.js with a focus on performance and usability. Built modular and reusable frontend components and implemented dynamic UI features.
- Independently managed application deployments using GitHub CLI, handling repository management, commits, branching, pull requests, and release workflows.
- Deployed production-ready builds on platforms like Vercel / Netlify, ensuring smooth CI/CD flow and version control. Integrated RESTful APIs to display dynamic data and improve application functionality.
- Collaborated with team members to review code, fix bugs, and implement feature enhancements following agile practices.

CERTIFICATIONS

Search Engine Optimization (SEO) with Squarespace | Certificate

August 2025

Full Stack Web Development By Internshala | Certificate

March 2024

PROJECTS

AI Code Reviewer | *Personal Project*

- Built a **web-based application** that integrates with an GeminiAPI to review source code, leveraging system prompts to provide contextual analysis.
- Implemented a **modular architecture** to keep the frontend, backend, and API integration loosely coupled for scalability and easy enhancements.
- Focused on creating a practical developer tool that demonstrates real-world applications of AI in software engineering.

Simply.ai : AI SaaS Application | *Personal Project*

- Developed a **scalable web platform** integrating multiple **AI-powered tools** to address real-world problem statements.
- Designed the system with **modular SaaS architecture**, enabling seamless addition of new AI services.
- Focused on **user-centric design**, delivering a clean interface and practical applications of AI for everyday use.

AI Meeting Assistant | *Personal Project*

- Built an AI-powered meeting assistant that records meetings and generates concise summaries highlighting key points, decisions, and action items.
- Implemented intelligent query handling to allow users to ask questions about the meeting and receive accurate, context-aware responses.
- Designed a modular and scalable architecture integrating transcription, summarization, and natural language understanding to improve productivity and reduce manual note-taking.

TECHNICAL SKILLS

Languages: JavaScript ,Python

Web Technologies: HTML/CSS, Tailwind/Bootstrap, React, Node.js, Express.js, Nextjs, MongoDB, MySQL, Wordpress,Redux,Context API

Developer Tools: Git, VS Code, Postman
