SUMMARY

Results-driven MERN Stack Developer with hands-on experience in designing, developing, and deploying full-stack web and mobile applications. Proficient in building scalable solutions using React, with a strong focus on creating intuitive user interfaces and robust back-end systems. Seeking to leverage expertise in JavaScript frameworks and modern development practices to contribute to a dynamic engineering team.

PROFESSIONAL EXPERIENCE

Acore it hub *Frontend Developer* | Indore MP

Dec 2025 - Mar 2026

- **Nearprop (Real Estate Website):** Built a user-friendly real estate platform enabling property search, listing, and management with a focus on seamless navigation and modern UI.
- **Dhanvi:** Developed a ride-hailing application prototype for quick and reliable local transport, integrating booking flow and geo-location features
- **Gharzi (Real Estate Website):** Designed and implemented a property marketplace website with advanced filters, onboarding flow, and responsive layouts for better customer experience.

Kiaan Technology *Frontend Developer* | Remote

Oct -2025 - Dec 2025

- Delivered multiple freelance projects acquired via bidders, ensuring high-quality and timely completion.
- **Fit Manager Pro** - Fit Manager Pro is a gym management system that makes it easy to handle members, their attendance, payments, workout plans, and the daily work that happens inside a fitness center.
- **Accounting** - Accounting is a business tool that helps you manage accounts, handle inventory, and keep all client details organized so everything stays easy to track and maintain.

Shanti Infosoft *Indore, M.P MERN Stack Developer Intern*

May -2025 - Oct -2025

- Designing and developing scalable web applications using the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Collaborating with cross-functional teams to gather and define project requirements.
- Implementing responsive UI designs using React.js and enhancing user experience through efficient front-end development techniques

Good Dept - Tech stack: ReactJS, Python, Sql

- Designed and developed a scalable financial web application using **React (frontend)**, **Python (Flask/Django backend)**, and **SQL (database)**.
- Built responsive and interactive UI components with **React.js**, enhancing user experience across devices.
- Implemented secure authentication and authorization for users applying for loans and credit cards.
- Integrated key features such as loan eligibility check, EMI calculator, and credit card comparison module.

ACADEMIC PROJECTS

Food App , *Tech Stack:* ReactJS, Node.js, Express, MongoDB

- **Developed a full-stack food delivery application** to manage restaurant menus, user orders, and customer reviews.
- **Created a dynamic ReactJS-based front-end**, allowing users to browse menus, place orders. Included form validation for smooth and error-free order processing.
- **Designed RESTful APIs in Node.js** for handling user authentication, order placement, and payment processing, ensuring seamless interaction with MongoDB for data persistence.
- **Implemented MongoDB** to store user data, order history, and restaurant details efficiently, optimizing for speed and scalability.

Udemy Clone .*Tech Stack:* ReactJS,

- **Developed a responsive Udemy clone frontend** using ReactJS, replicating key features such as course listings, course details, and user profiles.
- **Created reusable components** for seamless UI interactions, including course search, filter options, and course previews.
- **Used state management** (React hooks) to handle user interactions, such as adding courses to the watchlist and saving progress.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

Malwa Institute of Science & Technology, Indore MP

August 2024- July 2027 (Ongoing)

Diploma in Computer Science Engineering

Government Polytechnic College, Rewa, MP

August 2020 – July 2023

SKILLS

Frontend: React.js, Redux, Context API, JavaScript, Next.js,

UI Frameworks: Tailwind CSS, Material-UI, Ant Design, Stylesheet CSS

Backend: Node.js, Express.js

Databases: MongoDB, SQL **Tools & Platforms:** Git, GitHub, Postman, Visual Studio Code, Slack, Swagger
