Projects

ASRA(tours and travels agency)

Technologies Used: HTML, CSS, JavaScript, Basic Bootstrap, Python Django and MySQL.

Project Description : ASRA is an online Tours and Travels Agency that provides an effective solution for users to plan, manage and schedule their tour according to their requirements and demands.

The most important part of the online travel agency project is its tour packages and customization.

Our proposed system will consist of a user registration and login module for new users to register and login to the system. Users can see various tours available with packages and users may choose the destination and package. For successful booking users can make payment via credit card.

Smart AI chatbot(React + Google Gemini 2.0 Flash API)

- Built an interactive chatbot UI in React with floating toggle, chat history Management, and smooth auto-scroll functionality
- Integrated Google Gemini 2.0 Flash API for real-time, context-aware conversations with error handling and fallback responses.
- Designed modular components (ChatForm, ChatMessage, ChatbotIcon) for clean and scalable architecture

Skills

- Programming Languages:- JavaScript(ES6), Python, C++
- Web & Frameworks:- HTML5, CSS3, Javascript, React.js, Tailwind Css
