WORK EXPERIENCE

Software Engineer KDS Services Pvt. Ltd.

07/2024 - Present Lucknow
Designed and delivered enterprise internal platforms including HRMS and admin portals, focusing on scalable frontend architecture, reusable components, REST API integration, role-based access control, and responsive UI performance within Agile teams.

HRMS – Human Resource Management System KDS Services Pvt. Ltd.

Developed the **frontend for an HRMS platform** automating employee lifecycle, attendance, payroll, and document management. Implemented role-based access control, secure authentication, configuration-driven admin modules, and optimized database performance with responsive, production-ready UI.

Parivar Register System KDS Services Pvt. Ltd.

Developed a scalable government-style registry system with RESTful backend services, well-defined API contracts for smooth frontend-backend integration, optimized database queries for performance and data consistency, and followed Agile practices with regular code reviews.

LIMS- Digital Library Installation Monitoring System KDS Services Pvt. Ltd.

Developed a **React.js-based web portal** with real-time dashboards to monitor and verify digital library installations across schools. Implemented **status-driven workflows**, role-based UI access, and reusable components with REST API integration. Focused on **clean UI/UX, performance optimization, and scalable component architecture**.
