Professional Summary

Full Stack (MERN) Developer with 1+ year of hands-on experience in building scalable and secure web applications using React.js, Node.js (AdonisJS/Express), and MongoDB. Skilled in developing REST APIs, implementing authentication systems (JWT, role-based access), and managing frontend state using Redux.

SKILLS

- Frontend : HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Tailwind CSS, Bootstrap
- Backend : Node.js, Express.js, AdonisJS
- Databases : MongoDB, MySQL
- Tools & Technologies : Git, GitHub, Jira, Postman, Hoppscotch, VS Code, MongoDB Compass, MySQL Workbench, Chrome DevTools
- Soft Skills : Time Management, Teamwork, Problem-Solving, Quick Learner, Adaptability

WORK EXPERIENCE

Yunicorn Technologies Pvt Ltd

Full Stack Developer

July 2025 - February 2026

- Designed and developed secure RESTful APIs using Node.js (AdonisJS), including authentication and session management, ensuring reliable and scalable backend services
- Implemented JWT-based and role-based authentication to enhance application security and access control
- Managed complex frontend state using Redux, improving application performance and user experience
- Integrated frontend (React.js) with backend services, ensuring seamless API communication and data flow
- Used Git for version control, branch management, and collaborative development in a team environment
- Performed API testing, debugging, and validation using Postman and Hoppscotch to ensure high-quality deliverables

Technorizen Software Solution

Full Stack Developer

Dec 2024 - May 2025

- Built and deployed a full-stack web application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Designed responsive UI using HTML5, CSS3, Bootstrap, and component-based development.
- Developed and integrated RESTful APIs using Node.js and Express.js.
- Handled API communication between frontend and backend using Axios.

EDUCATION

SAGE University, Indore

Master of Computer Applications (MCA) - 8.28 CGPA

Aug 2023 - June 2025

PROJECTS

Pixy

Tech Stack: React.js, Node.js (AdonisJS), MongoDB, Redux, Formik

- Designed and implemented scalable REST APIs using Node.js (AdonisJS) with structured validation (VineJS), ensuring data integrity and reliability
- Developed secure authentication workflows including email verification and user session management, improving application security
- Built dynamic and complex forms using React.js (Formik) with API-based validation for better user experience and error handling
- Managed global application state using Redux, optimizing data flow and reducing unnecessary re-renders
- Integrated frontend and backend services to ensure seamless and secure data communication across the application
- Implemented business logic and validation to handle real-world user scenarios and improve system efficiency

Blog Management System

Tech Stack: Node.js, Express.js, MongoDB (Mongoose), React.js, Redux Toolkit, Cloudinary, JWT

- Designed and implemented a RESTful API with role-based access control (User/Admin) for a complete blog platform
- Implemented blog CRUD with Cloudinary image upload using stream-based async upload – old images auto-deleted on update/delete to prevent storage leaks
- Built a toggle-like system using MongoDB array operations, returning live like count per blog
- Admin can view, edit, and delete any user's blog; regular users are restricted to their own content – enforced at the service layer, not just route level
- Frontend state managed with Redux Toolkit using memoized selectors () to prevent unnecessary re-renders

CERTIFICATE

Training in Frontend Development

- CodeBetter
