PROFESSIONAL SUMMARY

Motivated Flutter Developer with hands-on experience in cross-platform mobile app development using Flutter & Dart. Proficient in GetX, Provider & Riverpod state management, REST API & HTTP integration, Hive local storage, and pixel-perfect UI from Figma. Solid experience with Firebase Auth & Firestore for real-time backend services. Currently advancing in BLoC architecture. Holds 2 job offer letters demonstrating strong industry demand. Available immediately from Indore, MP.

PROFESSIONAL EXPERIENCE

Flutter Developer

Voxturn Consulting Pvt. Ltd. — Gurgaon

Feb 9, 2026 – Mar 2026

Relocated to Indore due to health issue. Available immediately.

- Developed cross-platform mobile apps using Flutter & Dart with scalable architecture.
- Built reusable, responsive UI components translated from Figma designs.
- Integrated Firebase Auth & Firestore for secure login and real-time database.
- Implemented REST APIs using HTTP package for dynamic content delivery.
- Collaborated with senior developers to ship production-ready features on schedule.

Flutter Developer Intern

Emilo Pvt. Ltd.

Feb 1 – Feb 8, 2026

Left after receiving Voxturn Consulting offer letter.

- Worked on Emilo — Instagram-style social media & business networking app.
- Contributed to UI implementation, API integration & Firebase backend connectivity.
- Participated in feature planning for social feed, stories & business profile modules.

Flutter Development Training — 2 Months

Under Senior Developer Guidance

Training Period

- Gained practical Flutter exposure: UI strategies, state management, and backend connectivity.

PROJECTS

eMilo – Social Networking & Business Platform

Internship Project

Flutter · Dart · BLoC · Hive · REST APIs · Firebase

- Engineered scalable Instagram-inspired social media platform using Flutter (Dart).
- Applied BLoC pattern for clean architecture and efficient state handling.
- Utilized Hive for lightweight, high-performance local database management.
- Developed content sharing, engagement (likes/comments), and business promotion tools.
- Integrated APIs for real-time data synchronization and dynamic content delivery.
- Focused on modular code structure, reusability, and performance optimization.

School Management System

Flutter App

Flutter · Dart · Firebase Auth · Cloud Firestore · Provider · GetX

- Developed a full-featured school management app using Flutter (Dart).
- Used Firebase Authentication for secure login system.
- Integrated Cloud Firestore for real-time database management.
- Implemented state management (Provider/GetX) for efficient app performance.
- Created reusable widgets and optimized overall app performance.
- Ensured smooth multi-role access for teachers, students, and administrators.

File Arranging System

Academic Project

Python · Data Structures · Sorting & Searching Algorithms · CLI

- Developed system to organize and manage files using sorting and searching algorithms.
- Implemented file categorization, retrieval, and structured storage functionalities.
- Applied data structures to optimize file arrangement and improve search efficiency.
- Designed simple user-friendly CLI interface for managing files effectively.
- Improved system performance by significantly reducing file access time.

Shree Parent School Application

Training Project

Flutter · Dart · GetX · Firebase · REST APIs

- Developed parent-focused school management mobile application using Flutter.
- Implemented GetX for state management, routing, and dependency injection.
- Designed intuitive responsive UI using Material Design principles.
- Integrated student progress tracking, attendance monitoring, and notifications.
- Connected with Firebase / REST APIs for real-time data handling.
- Optimized app performance for smooth user experience across all devices.
