SUMMARY

Innovative and results-driven software developer with problem-solving skills, focused on creating efficient, scalable, and user-friendly applications. Passionate about continuous learning and contributing to impactful projects.

TECHNICAL SKILLS

C++
JAVA
Flutter App Development
DSA in C++

SOFT SKILL

- Leadership Quality
- Adaptability
- Communication skill

Project

1. E-Commerce App

Developed a full-featured e-commerce app using Flutter for the front-end and Firebase for backend services. The app includes user authentication, product listing, shopping cart, order placement, and secure checkout. Integrated Firebase Authentication, Firestore for real-time database, and Cloud Storage for managing product images. Focused on clean UI/UX, responsive layouts, and efficient state management using Provider/GetX.

2. Matrimony (Wedding Partner Finder) App

Developed a Flutter-based matrimony app with user authentication via API, profile creation, and dynamic fetching of partner profiles from the backend. Designed a clean and responsive UI with search and filter features for finding suitable matches.
