EDUCATION

- Netaji Subhas University of Technology (NSUT)** Delhi, India
Bachelor of Technology – Information Technology; CGPA: 8.13 / 10 July 2019 – June 2023

TECHNICAL SKILLS

- Languages:** Kotlin, Java, Dart (Flutter – in progress), Python, SQL
- Android:** Jetpack Compose, Android SDK, MVVM, Clean Architecture, Activities, Fragments, Jetpack Libraries, Material Design 3, Wear OS
- Architecture:** MVVM, Repository Pattern, Coroutines, Kotlin Flow, LiveData
- Networking & APIs:** Retrofit, REST APIs, OkHttp, JSON parsing
- Databases:** Room DB, Firebase Firestore, Firebase Realtime Database, SQLite
- Firestore:** Authentication, Firestore, Realtime DB, Cloud Messaging (FCM), Storage
- Payment:** RazorPay Payment Gateway, Wallet Systems, Transaction History
- Tools:** Android Studio, Git & GitHub, VS Code, Glide, Postman
- Frontend:** XML, HTML, CSS, ReactJS (basics)
- Play Store:** App publishing, Production releases, Version management, Wear OS deployment

EXPERIENCE

- Freelance Android Developer** Delhi, India
Kapada Dry Cleaners | Contract · Remote Jan 2024 – Mar 2024
 - Migrated a static laundry website into a fully functional Android app using Kotlin and Android SDK, achieving a **40% improvement** in task completion rate for laundry order booking.
 - Implemented a seamless booking system with intuitive UI/UX using Activities, Fragments, and Material Design components.
 - Integrated **RazorPay** payment gateway for in-app transactions and built a wallet system with complete transaction history for users.
 - Integrated **Retrofit** for REST API consumption and efficient JSON response handling.
 - Set up **Firebase Cloud Messaging (FCM)** for sponsor push notifications delivered via an admin panel.
 - Used **Firebase Firestore** for real-time data sync and Firebase Storage for media uploads.
 - Managed end-to-end **Play Store** deployment: version management, release tracks, and production rollout.

PROJECTS

- Kapada Dry Cleaners – Android App** Jan 2024 – Mar 2024
Kotlin · MVVM · Firebase · Retrofit · RazorPay · Glide · Android Studio
 - Converted a non-interactive single-page website into a fully functional consumer Android app with modern UI and smooth navigation.
 - Built an optimised laundry order booking system, improving task completion rates by **40%**.
 - Implemented RazorPay payment gateway and a wallet system with full transaction history.
 - Integrated Firebase backend: Firestore, Storage, Authentication, and Cloud Messaging (FCM).
 - Published on Google Play Store – managed production release, version updates, and rollout. [\[Play Store Link\]](#)
- Neon Pulse Anime Watch Face – Wear OS** May 2025
Wear OS · Samsung Watch Face Studio · Google Play Store
 - Designed a custom neon-style digital watch face for Wear OS using Samsung Watch Face Studio.
 - Configured time, date, and battery indicator elements for smooth performance on wearable devices.
 - Successfully deployed and managed production updates on the Google Play Store. [\[Play Store Link\]](#)

KEY ACHIEVEMENTS

- Delivered a production Android app end-to-end as a freelancer – from requirements to Play Store launch.
- 40%** improvement in task completion rate through UX optimisation of the laundry booking flow.
- Two published apps on Google Play Store including Wear OS platform deployment.
- Integrated a live payment system (RazorPay) in a consumer app handling real financial transactions.

CURRENTLY EXPANDING

- Skills:** Flutter & Dart (cross-platform), Kotlin Coroutines & Flow, Dagger Hilt (Dependency Injection), Unit Testing with JUnit & Espresso, CI/CD with GitHub Actions, Clean Architecture
