PROFILE

PHP Backend Developer specializing in **Laravel**, **RESTful APIs**, and secure authentication (**JWT**, **RBAC**). Experienced in building scalable, high-performance backend systems and database-driven applications using **MySQL** and **Eloquent ORM**. Proficient in admin dashboards with **Livewire** and **Filament**. Skilled in delivering e-commerce and corporate solutions using **Shopify** and **WordPress**, focusing on performance and scalability.

Education

Master of Computer Application , Mangalayatan University	05/2023 – 07/2025 Aligarh
Bachelors Of Arts , Christ Church College	05/2020 – 07/2023 Kanpur

PROFESSIONAL EXPERIENCE

Backend Developer – Laravel (Internship) , HSB Info Tech Pvt Ltd	10/2025 – Present Hyderabad
- Developed a Hospital Management System backend using Laravel (PHP) - Built and deployed 15+ RESTful APIs for managing patients, doctors, staff, and hospital data - Implemented JWT authentication with Role-Based Access Control (RBAC) using Laravel middleware and guards - Designed CRUD APIs with pagination, sorting, and filtering for efficient data management - Integrated MySQL database using Eloquent ORM for relational data handling - Developed admin dashboards using Livewire and Filament for streamlined operations - Followed clean architecture and best practices for scalable development	

PROJECT

Train Ticket Booking System 📄, *Laravel, MySQL, Stripe*

- Developed a full-stack **train ticket booking system** using **Laravel, PHP, and MySQL** with MVC architecture
- Implemented **user authentication and profile management system** with secure session handling
- Built **train search and listing module** with route
- Developed **class-based ticket booking system** (First Class, Sleeper, Economy) with dynamic pricing logic
- Integrated **Stripe payment gateway** for secure and seamless online transactions
- Implemented **secure checkout workflow** with payment validation and confirmation
- Generated **automated PDF tickets** including passenger and journey details using backend processing
- Created **booking history module** for users to track past reservations
- Designed **admin dashboard** for managing trains, users, and bookings efficiently
- Enabled **train management system** with CRUD operations (add/view trains and schedules)
- Integrated **role-based data access and system monitoring features** for admin control
