PROFILE

Senior Laravel Developer with 8+ years of full stack experience building scalable SaaS platforms, virtual exhibition platforms, social media applications, mobile applications using NativePHP, customer portals, REST APIs, payment integrations, reporting systems, and cloud-hosted products. Strong backend expertise in Laravel 12, PHP 8.4, NativePHP, MySQL, Redis, queues, caching, security, and performance optimization, with modern frontend development using React.js, Tailwind CSS, Livewire, and Inertia.js. Experienced in developing cross-platform Android and iOS applications with NativePHP, including native device integrations, biometric authentication, push notifications, offline capabilities, media handling, and seamless API synchronization. Skilled in architecting scalable systems, optimizing application performance, implementing DevOps workflows, and delivering production-ready enterprise solutions with clean UI/UX and maintainable code architecture.

PROFESSIONAL EXPERIENCE

Freelance 2026 - Present
Senior Laravel / NativePHP Developer

- Built a Laravel-based virtual exhibition platform with a multi-domain tenancy system for isolating event, exhibitor, and visitor experiences.
- Developed a NativePHP-powered social media application with mobile-first workflows, API-driven backend integration, and production-ready UX patterns.
- Implemented scalable backend architecture with REST APIs, queue-ready workflows, caching strategy, secure authentication, and cloud deployment readiness.

DeepDive Media Pvt. Ltd. 2023 - 2026
Senior Full Stack Developer

- Architected scalable web applications and API services using Laravel, Node.js, React.js, MongoDB, and RESTful backend patterns.
- Led development execution, technical reviews, sprint priorities, and mentoring for production-focused engineering teams.
- Designed secure data models, integrations, and backend workflows for high-traffic SaaS and social application features.

KeenAgile 2021 - 2023
Full Stack Developer

- Built Laravel backends, secure APIs, admin portals, reporting modules, and AWS EC2/Nginx deployments for business platforms.
- Modernized user-facing portals, integrated third-party APIs, and improved maintainability through reusable Laravel architecture.
- Converted complex ESG Excel formulas into structured database logic and generated reports using Laravel, DevExtreme, and PDFs.

Freelance 2020 - 2021
Full Stack Developer

- Delivered PHP, Laravel, JavaScript, HTML, CSS, and responsive frontend projects with independent client ownership.
- Integrated secure Salesforce authentication in a Laravel application for authenticated data synchronization workflows.

AIS Technolabs

2019 - 2020

Senior Software Developer

- Coordinated a 10+ member team across QA, UI design, web design, and development while managing delivery quality and timelines.
- Mentored developers through implementation planning, technical reviews, and maintainable application practices.

Neologicx

2018 - 2019

Software Developer

- Developed portals, websites, and REST APIs using Laravel 4.2 through 5.8 and WordPress for web and mobile application teams.
- Built API contracts for cross-platform mobile apps and strengthened delivery documentation across multiple projects.

Cyberops Infosec

2017 - 2018

Junior Software Developer

- Contributed to a CEF-based Letter Management System using HTML, CSS, and JavaScript in an information-security environment.

FEATURED PROJECTS

- Virtual Exhibition Platform: Laravel multi-domain tenancy, exhibitor/visitor workflows, REST APIs, queue-ready backend processes, and cloud deployment readiness.
- NativePHP Social Media App: mobile-first social workflows, API integrations, profile/media features, real-time-ready UX, and Laravel backend alignment.
- Laravel + React Dashboard: JWT-authenticated dashboard for book reviews and user management. GitHub: github.com/vipertecpro/laravel-react-dashboard
