PROJECTS

Headset E-Commerce Web Application, *React + Django*

Technologies: Python Django, Django REST Framework , React.js, JavaScript, CSS, Bootstrap, MySQL.

- Built a full-stack e-commerce platform for selling headsets with user and admin modules.
- **User features:** View headsets, check product details, add items to cart, and complete purchase flow.
- **Admin features:** Add new headsets, update product details, and delete products via a secure admin panel.
- Developed **frontend using React** (components, state management, API integration).
- Implemented **backend using Django & Django REST Framework** for API endpoints, JWT authentication, and CRUD operations.
- Integrated database models for products, users, and cart management.
- Ensured responsive UI and smooth user experience.
-

Book E-Store Web Application (Django)

- **Technologies:** Python, Django, HTML, CSS, Bootstrap, MySQL.
- Developed a book store web application using Django with separate user and admin modules.
- **Admin features:** Add, update, and delete books through the Django admin panel.
- **User features:** View available books and check detailed information.
- Implemented database models, templates, and secure CRUD operations.
