Frontend: HTML5, CSS3, Tailwind CSS, JavaScript, React.js
Backend: PHP, Node.js, Express.js, Laravel (MVC, Blade, Authentication, CRUD, REST APIs)
Database: MySQL, PostgreSQL, MongoDB
Tools: Git, GitHub, GitLab, VS Code, Laragon, XAMPP, Figma
Languages: JavaScript, PHP, Python, C

WORK EXPERIENCE

Full Stack Developer Intern at Yasham Software Services Pvt. Ltd. | [Yasham Software](#) Aug 2025 - Dec 2025

- Developed and maintained Laravel-based backend modules including authentication, role-based access control (RBAC), and admin dashboards.
- Contributed to real-world client projects such as Hospital Management Systems and Business Management applications.
- Designed and integrated RESTful APIs with Blade templates and AJAX-driven frontend components.
- Collaborated with team members using Git/GitLab for version control, code management, and deployment workflows.

Internship & Industrial Training at Euphoria GenX | [Euphoria GenX](#) Aug 2024 - Dec 2024

- Built responsive web applications using HTML, CSS, JavaScript, PHP, MySQL, and Bootstrap.
- Developed backend functionalities including authentication systems, CRUD operations, and database integration.
- Improved problem-solving and debugging skills through hands-on project development.

PROJECTS

Singhal Steel | Business Management Web & Mobile Application

- Developed Laravel-based backend APIs to support both web and mobile applications.
- Integrated MySQL database with backend modules ensuring validation, structured workflows, and secure data handling.
- Assisted in API testing, debugging, and backend integration for smooth application performance.

Personal Developer [Portfolio](#) | React.js & Tailwind CSS

- Built a high-performance portfolio using React.js and Vite for fast, seamless navigation.
- Engineered a modular component architecture for scalable project rendering and dynamic content updates.
- Designed a responsive, mobile-first interface utilizing Tailwind CSS for cross-device consistency.

Zing | Full-Stack Social Media Platform | [Zing](#)

- Developed a social media platform inspired by Instagram using Laravel, PHP, PostgreSQL, Tailwind CSS, JavaScript, and Blade.
- Implemented core features including authentication, post creation, likes, comments, user profiles, and responsive UI components.
- Designed and managed relational database schemas in PostgreSQL for users, posts, interactions, and media handling.
