Profile

Laravel Developer with 1+ year of experience delivering scalable web applications using Laravel and RESTful APIs. Experienced in building and maintaining backend systems such as inventory and CRM applications with modern frontend integration using React.js. Improved application performance by 30% through optimized Eloquent queries, caching strategies, and database tuning. Strong experience in collaborative development, code reviews, and Agile workflows.

Skills

Languages: PHP, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: Laravel, jQuery, Bootstrap, React.js

Tools: VSCode, Postman, Git, GitHub, Gitlab

Work Experience

Vibrace Technologies Private Limited, Chennai

Apr 2025 - Apr-2026

Software Developer

- Developed back-end modules and full-stack features using PHP, Laravel, and MySQL, ensuring clean, efficient, and maintainable code following MVC architecture and security best practices.
- Integrated REST APIs and payment gateways, handling secure JSON data processing and database design for scalable applications.
- Developed responsive front-end components using HTML, CSS, JavaScript, and React.js, improving user experience and UI performance.
- Debugged application issues, performed testing, and resolved bugs to improve system stability and performance.
- Collaborated in an Agile development environment, participating in sprint planning, daily stand-ups, code reviews.
- Executed live deployment and post-launch support for production applications.

Gowebez, Chennai

Aug 2024 - Jan 2025

Junior FullStack Web Developer Intern

- Built and maintained dynamic web applications using PHP, Laravel, and MySQL, writing clean and maintainable code following MVC architecture.
- Developed CRUD operations and back-end logic while assisting in front-end tasks using HTML, CSS, and JavaScript for complete feature delivery.
- Integrated MySQL databases, wrote efficient queries, and ensured proper data handling for small to medium-scale projects
- Debugged application issues using browser developer tools and logs, improving overall stability and user experience.
- Used Git for version control and collaborated with senior developers in a team environment, learning industry best practices.
- Assisted in feature enhancements and application updates, gaining hands-on experience with REST APIs.

Education

MARGREGORIOS COLLEGE OF ARTS AND SCIENCE Chennai

JUN-2021 - MAY 2023

BSC Computer Science

CGPA: 8.5

Relevant Coursework: Object Oriented Programming, RDBMS, Python, Web Development

Project Work

- **Learning Management System (LMS) — React.js, Laravel, MySQL** : Developed a full-stack Learning Management System using React.js and Laravel to manage courses, students, and learning content. Built RESTful APIs in Laravel and integrated them with the React frontend for smooth and efficient data flow. Designed and optimized MySQL database structure for courses, enrollments, and assessments to support scalable application performance.
- **Job Portal Management System — Laravel, PHP, MySQL** : Developed a scalable Job Portal Management System to streamline job posting, candidate applications, and recruitment workflows. Implemented secure role-based authentication and authorization for Admin and Job Seeker modules. Engineered robust CRUD functionalities and business logic following Laravel MVC architecture. Designed and optimized relational database structures to ensure efficient data management and application performance.
