PROJECT

Title: Blockchain-Based Authorization Mechanism for Educational Social IoT

Duration: Dec/2023 – March/2025

- Developed a **blockchain-based decentralized authorization system** using **Java** to securely manage IoT device access in educational institutions.
- Implemented **smart contracts** for **tamper-proof authentication** and transparent access control.
- Designed **decentralized identity management** to authenticate students, faculty, and smart devices.
- Maintained **immutable access logs** on the blockchain to ensure data integrity and traceability.
- Integrated **MySQL** for structured data storage and system coordination.
