

# JOKKIM DORAS X

Frontend Engineer | React.js | TypeScript | JavaScript | Next.js

Email: jokkimxavier@gmail.com | Phone: 8973341703 | [GitHub: JokkimDoras](#) | [LinkedIn: JokkimDoras](#)

---

## PROFESSIONAL SUMMARY

B.Tech Information Technology graduate focused on frontend engineering with strong experience in building scalable web and mobile applications using modern JavaScript frameworks. Skilled in developing responsive interfaces, reusable component systems, and production-grade UI architecture with a strong focus on performance, maintainability, and clean engineering practices. Passionate about working on deep engineering problems, solving real production challenges, and building products beyond just writing code.

## TECHNICAL SKILLS

**Frontend Technologies:** React.js, TypeScript, Next.js, React Native, JavaScript (ES6+), React Router

**Backend Technologies:** Node.js, Express.js, PostgreSQL, Supabase, REST APIs, JWT Authentication

**State Management:** Redux Toolkit, Redux, Context API, React Hooks

**Styling & UI:** Tailwind CSS, Flexbox, CSS Grid, Responsive Design, Media Queries

**Tools & Platforms:** Git, GitHub, VS Code, NPM, REST APIs, Vercel, Figma, Postman

**Concepts:** Component-Based Architecture, SPA, Agile, Web Performance Optimization

## PROJECTS

---

### Frontend Contribution – Legacy JavaScript to TypeScript Migration & UI Improvements 2026

<https://github.com/JokkimDoras/movies-info>

- **Migrated 20+ React components**, pages, and API modules from JavaScript to TypeScript, introducing strict prop interfaces and replacing PropTypes with typed component definitions across the codebase.
- Typed Axios responses and useState hooks for end-to-end type safety across the codebase.
- Introduced a centralized **types/** directory for shared movie API type definitions
- Fixed horizontal scrolling bugs to improve mobile responsiveness and cross-device usability.

### NPM Registry Developer Tool | React TypeScript Web Application 2025

<https://github.com/JokkimDoras/the-library>

- Built a developer-focused React + TypeScript application for npm package discovery, real-time search, and detailed package metadata exploration using the npm Registry API.
- Integrated the npm Registry API to fetch live data, handle loading/error states, and display install commands for developers.
- Implemented React Router for multi-page navigation with a scalable component-based architecture.

### SocialNetwork | Facebook-like Social Media Platform | Next.js, TypeScript, Supabase 2025

<https://social-network-rho-liard.vercel.app/register>

- Built a full-stack social media web application with authentication, personalized feeds, user profiles, posts, likes, comments, and follow/unfollow functionality.
- **Designed 20+ REST API endpoints** covering posts, users, feed, and file uploads via Supabase Storage.
- Implemented JWT-based authentication using Supabase Auth, protected routes with Next.js middleware, and secure access control using Row Level Security (RLS).

## EDUCATION

---

### B.Tech – Information Technology

Nov 2022 – May 2026

Anand Institute of Higher Technology

CGPA: 7.6 / 10 | Graduated in 2026

## ADDITIONAL INFORMATION

---

**Certificate:** Modern React with Redux - Udemy
