EXPERIENCE

Hands-on experience through academic projects including the development of an E-Learning Management System and an AI-Powered Interview Platform.

E-Learning Management System (Academic Project)

- Developed a web-based E-Learning Management System to manage courses, students, and learning materials.
- Implemented features like user authentication, course enrollment, and assignment submission.
- Enabled teachers to upload study materials and track student progress.
- Improved the online learning experience through a structured dashboard for students and educators.

AI- Powered Interview Platform (Academic Project)

- Developed MockChamp – an AI-Powered Interview Preparation Platform with features like AI-generated questions, real-time feedback, and interview simulation.
- Implemented secure user authentication and performance tracking dashboard for candidates.
- Built a full-stack system using React.js, Next.js, PostgreSQL, Clerk Authentication, and Docker

AREA OF INTREST

web technologies, Java Development, Data science, data analysis, artificial intelligence, Python.

SKILLS

- Backend: JavaScript,Python
- Frontend: HTML,CSS,Reactjs,Angular,Tailwind CSS
- Database: Sql,MySQL
- Tools & IDE :VS Code
