EXPERIENCE

Junior Developer (Priority Solution)

April 2025 – March 2026

- Skilled in Laravel, JavaScript, and AJAX, focused on building efficient and scalable web applications.
- Developed a Restaurant Admin Dashboard to manage orders, track daily sales, and generate reports.
- Built a full E-commerce Web Application with user features (product browsing, cart, orders) and admin panel for managing products and customers.
- Implemented authentication systems for secure login and user management.
- Worked with AJAX for dynamic data handling and real-time updates.
- Also create Payment Gateway and API.
- Continuously improving skills with focus on performance optimization and clean code.

SKILLS SUMMARY

- Languages: PHP, Java (DSA), SQL, HTML, CSS, Bootstrap
- Technologies: Laravel, JavaScript, AJAX, Spring Boot, Regression Testing, Manual Testing
- Tools: Git, GitHub, Excel, PowerPoint
- Platforms: VS Code, Eclipse

PROJECTS

MUSIC PORTAL (Academic Project using PHP):

March 2024 – June 2024

- I made a project named MUSIC PORTAL. The purpose of the system is to provide an online web application where users can easily play trending songs. The project uses PHP, HTML, CSS, Bootstrap.

FOOD DELIVERY SYSTEM (Academic Project | Backend: Spring Boot | Frontend: React.js):

- Developed a full-stack food delivery web application using Spring Boot and React.
- Implemented user authentication, restaurant listing, food ordering, cart management, and order tracking features.
- Designed RESTful APIs for communication between frontend and backend.
- Used MySQL database for storing user, menu, and order data.
