PROFESSIONAL SUMMARY

Frontend Developer specializing in React.js, JavaScript, HTML5, CSS3, and Tailwind CSS with experience building scalable, responsive, and user-centric web applications. Strong understanding of component-based architecture, REST API integration, state management, frontend performance optimization, and modern UI development. Skilled in developing dynamic dashboards, streaming platforms, and productivity applications using modern frontend technologies. Passionate about creating high-performance user experiences and writing clean, maintainable code.

TECHNICAL SKILLS

Frontend Technologies

- React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- Responsive Web Design, Flexbox, CSS Grid
- Component-Based Architecture
- API Integration, Dynamic Routing

Backend Technologies

- Node.js, Express.js
- RESTful API Development

Database • MongoDB Developer Tools

- Git, GitHub, Docker
- VS Code

Libraries

- Chart.js
- Recharts
- Socket.IO

PROJECTS

Analytics Dashboard — React.js, Chart.js, Recharts

- Developed a responsive analytics dashboard for visualizing business and performance metrics.
- Implemented interactive charts, dynamic filters, and real-time data updates using Chart.js and Recharts.
- Created reusable React components to improve maintainability and scalability.
- Optimized rendering performance and improved user experience across desktop and mobile devices.
- Consumed REST APIs and transformed large datasets into actionable visual insights.

Video Streaming Frontend (Netflix Clone) — React.js, JavaScript, REST API

- Built a Netflix-inspired video streaming interface with responsive layouts and modern UI design.
- Implemented category-based browsing, content discovery, hover previews, and dynamic content rendering.
- Integrated third-party REST APIs for fetching movie and television content.
- Improved application responsiveness using optimized component rendering techniques.
- Designed mobile-first user interfaces using CSS Grid and Flexbox.

Kanban Board (Trello Clone) — React.js, JavaScript

- Developed a drag-and-drop task management application with multiple workflow boards.
- Implemented task creation, editing, deletion, and movement between workflow stages.
- Built reusable UI components following modern React development practices.
- Managed application state efficiently and implemented persistent storage functionality.
- Enhanced productivity through intuitive user interactions and responsive design.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Engineering

D.Y. Patil University, Pune

2022 – 2026

ACHIEVEMENTS

- Participant – Smart India Hackathon (SIH).
- Built multiple production-style frontend applications using React.js and JavaScript.
- Strong understanding of frontend architecture, API integration, and responsive web development.
- Consistently applied clean code principles and Git-based development workflows.

CORE COMPETENCIES

React.js, Frontend Development, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design, REST APIs, User Interface Development, User Experience Design, Web Application Development, Component-Based Architecture, API Integration, Git, GitHub, MongoDB, Node.js, Express.js, Frontend Optimization, Cross-Browser Compatibility, Agile Development, Problem Solving.
