SKILLS

- HTML
- CSS
- Javascript
- React.js
- MongoDB
- Bootstrap
- Node.js

LANGUAGES KNOWN

English (Both)

PERSONAL DETAILS

Current Location Panipat
Date of Birth September 4, 2005
Male

EDUCATION

Graduation

Course B.Tech / B.E. (Computer Science and Engineering (CSE))
College Baba Mastnath Engineering College, Rohtak
Score 9.1%

Schooling	Class XII	Class X
Board Name	CBSE	CBSE
Medium	English	English
Year of Passing	2024	2022
Score	69%	62%

PROJECTS

News App | February 2026 - March 2026

- Built a responsive News App using React.js by integrating a third-party News API to fetch and display 400+ real-time news articles. The app organizes news into category-based sections such as Entertainment, Sports, Science, Health, and Business through an interactive navbar, making content discovery easier for users. Initially implemented Previous and Next pagination, but later enhanced user experience by replacing it with Infinite Scroll for smoother navigation and continuous content loading. Added loading spinners to improve UI responsiveness during API fetch delays. Used React Router DOM for seamless client-side routing between pages and categories without full page reloads, ensuring smooth navigation. Implemented useState for efficient state management and dynamic content updates within components. This project strengthened my practical knowledge of API integration, React component structure, routing, state management, performance optimization, and user-centric interface design.
