Summary

Full-stack web developer graduating in 2026, skilled in the MERN stack and AI, with experience building scalable web applications and integrating intelligent features across frontend and backend systems. Proficient in designing clean, efficient architectures and optimizing performance for real-world applications. Passionate about learning new technologies, solving complex problems, and building user-focused, innovative digital solutions.

Skills

Programming Languages: Java, JavaScript C, Python

Frontend: React.js

Backend: Node.js, Express.js

Database: MongoDB

Core Concepts: Computer Networks, Operating System , DBMS, OOPs

Experience

Full Stack Web Developer - NIELIT

July 2025 – August 2025

- Developed and maintained RESTful APIs using Node.js and Express.js to support scalable backend services.
- Designed and managed NoSQL databases using MongoDB, implementing optimized schemas and efficient queries.
- Implemented authentication and authorization using JSON Web Token to secure application endpoints.
- Built backend modules for user management, transactions, and API integrations.
- Developed admin panels and data management features.
- Collaborated with frontend developers to integrate backend services with JavaScript based web applications.

Projects

E-Commerce Website | (MERN)

August 2025 – October 2025

- Developed a full-stack e-commerce web application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented secure user authentication and authorization using JWT and bcrypt.
- Built RESTful APIs for product management, cart operations, and order processing.
- Developed shopping cart and checkout functionality with dynamic price calculations.
- Integrated MongoDB database using Mongoose for efficient data storage and retrieval.
- Designed a responsive user interface with React for seamless user experience across devices.

Contact Management App | (MERN)

November 2025 – January 2026

- Developed a full-stack contact management application using MongoDB, Express.js, React, and Node.js.
- Implemented RESTful APIs for creating, updating, deleting, and retrieving contact data.
- Designed responsive and user-friendly frontend interfaces with React.
- Integrated secure backend services with efficient database schema design.
- Optimized application performance and ensured smooth data handling across client and server.

Awards & Certifications

- **DSA Course Completion Certificate - Apna College (2025)** Completed Data Structures and Algorithms (DSA) course from Apna College in 2025, strengthening problem-solving skills and algorithmic thinking using Java.
- **MERN Stack Development - NIELIT 45-Day Summer Training** – National Institute of Electronics and Information Technology (NIELIT), 2025

Education

B.Tech CSE

Graduation: 2026

Institute of Technology and Management, Gida
