OBJECTIVE

Accomplished **Full Stack Web Developer** with **1+ year** of experience architecting and deploying production-grade web applications. Proficient in **Python, Django, React.js, and MySQL**, with expertise in scalable RESTful APIs, secure role-based systems, and responsive, performance-driven interfaces. Committed to clean, maintainable code and measurable impact through agile collaboration.

EXPERIENCE

Full Stack Web Developer

Joxtel Tech Solution

Jun 2024 – Present

On-site, Haryana, India

- Spearheaded end-to-end development of production client websites, orchestrating React.js frontends with scalable Django backends for live business platforms.
- Architected RESTful APIs and database-driven modules for dynamic content, forms, and workflows — strengthening system reliability and application performance.
- Optimized frontend rendering and backend queries for mobile-first, cross-browser delivery; shipped features iteratively using Git, GitHub, and agile practices.

TECHNICAL SKILLS

Languages

Python, JavaScript, HTML5, CSS3

Frameworks & Libraries

Django, React.js, Bootstrap, jQuery

Database

MySQL

Tools & Practices

Git, GitHub, VS Code, RESTful APIs, Responsive Design, Agile

PROJECTS

Conceivelif.com

conceivelif.com

Fertility Awareness Platform

Django, React.js, MySQL

- Developed a production website for eBook sales, free fertility assessments, and 90-day cycle tracking tools.
- Built consultation booking, secure payment integration, and a customer dashboard for content access.

RemovalistNearMe.au

removalistnearme.au

Removalist Comparison Platform

Django, React.js, MySQL

- Created an Australia-wide quote platform with multi-step forms, city listings, and verified mover profiles.
- Implemented responsive UI and backend modules for service categories, route pages, and lead capture.
