PROJECT

Anime Streaming Web Application

Live Demo:

ss-anime-streaming-website.vercel.app

GitHub Repository:

github.com/shivamsoni9079/SS-anime-streaming-website

Developed a fully responsive Anime Streaming Web Application using HTML5, CSS3, and JavaScript with real-time API integration using the Jikan API. Built dynamic anime listing pages, reusable components, pagination, and interactive UI sections for a smooth user experience.

Key Features:

- Real-time anime data fetching using REST API
- Dynamic anime cards with images, ratings, and episode details
- Responsive design optimized for desktop, tablet, and mobile devices
- Pagination system for browsing anime pages
- Watch page with anime details and localStorage integration
- Loading states and error handling for improved UX
- Modern UI using Flexbox and CSS Grid layouts

Technologies Used:

HTML5, CSS3, JavaScript (ES6), REST API, LocalStorage, Responsive Web Design
