EDUCATION

M.L. Dahanukar College Of Commerce

B.Sc in Information Technology — CGPA: 8.17/10

Vile Parle, Maharashtra

2023 - 2026

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend & Mobile: React Native, Flutter, Next.js, React, Tailwind CSS, Expo

Backend & Databases: Firebase, Supabase, Appwrite, MongoDB, MySQL, Cloud Firestore

Tools & Technologies: Git, GitHub, REST APIs, VS Code, Figma, Vercel

HIGHLIGHTS

- Built 7+ full-stack mobile and web applications using React Native, Flutter, and Next.js.
- Successfully built cross-platform mobile application with real-time databases and authentication systems.
- Developed offline-first application workflows using OCR, local storage, and cloud synchronization.

PROJECTS

HopMate | *React Native, Expo Maps, Appwrite, Location Services* | [GitHub](#)

Aug 2025 – Apr 2026

- Developed a peer-to-peer ride pooling application enabling real-time cost-sharing between passengers and local drivers.
- Implemented proximity detection and live location-based services using Expo Maps and geolocation APIs.
- Integrated Appwrite backend for secure authentication, database management, and scalable user data handling.

Parsr | *React Native, TypeScript, Expo, ML Kit, OCR* | [GitHub](#)

Jan 2026 – Feb 2026

- Built an offline-first receipt scanner that converts physical bills into structured digital expense records.
- Integrated ML Kit OCR and regex-based parsing to automatically extract merchant names, totals, and expense categories.
- Designed interactive expense visualization workflows to help users analyze personal spending patterns efficiently.

Matrika Angan | *Next.js, Tailwind CSS, Supabase* | [GitHub](#)

Jan 2026 – Mar 2026

- Developed a production-ready ecommerce platform for an Indian saree startup with responsive and modern UI design.
- Implemented dynamic product management and backend data handling using Supabase services and APIs.
- Optimized frontend performance and user experience using Next.js server-side rendering and Tailwind CSS.

Taskly | *Flutter, Firebase, Cloud Firestore* | [GitHub](#)

May 2026

- Created a cross-platform task management application with secure authentication and real-time cloud synchronization.
- Integrated Firebase Authentication and Cloud Firestore for scalable task storage and seamless user management.
- Built clean and responsive mobile UI workflows focused on productivity and intuitive task organization.
