PROJECTS

[Home-pay ↗](#)

Sep 2025

- Built Home-Pay, a modern frontend web application using React.js and Vite for fast development and optimized performance. Implemented Context API for efficient state management and used React Icons to enhance the user interface. Developed a clean, responsive, and dynamic UI with reusable components, including dark mode functionality and mobile-friendly layouts. Deployed the project on Vercel for seamless hosting and continuous deployment.
- Technologies Used: React.js, Vite, Tailwind CSS, Context API, React Icons, Dark Theme, Responsive Design, Vercel Deployment.

[zoop-cart ↗](#)

Jun 2025

I built a frontend project called zoop-cart using React with Vite for fast development. I used Context API for state management, React Icons for UI icons, The project focuses on creating a clean and dynamic user interface with reusable components.

SKILLS

- Frontend development
- Backend development
- REST API
- Node.js
- React
- MongoDB
- Express.js
- Debugging
- Postman
- Next.js

ADDITIONAL DETAILS

- 1-Opps 2-OS & networking 3-redux 4-DSA (Basic) Everyday learning new in coding that is my hobby and resolve the issue it is my achievements.
