Experience

Param Computer PVL

Jan 2024 - May 2025

Postify – Social Media Web App

- Developed a **full-stack social media platform** using **Spring Boot** (Java) and **React + Redux**, featuring posts, comments, likes, and **real-time WebSocket chat**.
- Implemented **Cloudinary** image storage, **JWT authentication** with **Spring Security**, and integrated an **AI chatbot** for enhanced user engagement.
- Set up **CI/CD deployment** with **Vercel** (frontend) and **Railway** (backend) for smooth and continuous delivery.

HTML And CSS

- **Expert** in creating well-structured and semantic HTML5 web pages **that improve accessibility, SEO, and overall maintainability of websites**.
- **Proficient in CSS3** for building responsive and visually appealing layouts using Flexbox, Grid, media queries, and modern styling techniques.
- **Skilled in implementing CSS animations, transitions, and hover effects** to enhance user interaction and engagement.
- **Experience in designing mobile-friendly websites with cross-browser compatibility**, ensuring consistent appearance and functionality across devices.
- **Adept at form creation, input validation, and styling** to provide smooth and user-friendly web forms.

JavaScript

- **Strong** command over JavaScript for creating dynamic and interactive web applications, **including DOM manipulation and event handling**.
- Experienced in using **ES6+ features** such as arrow functions, template literals, destructuring, and modules for modern, clean code.
- **Skilled in asynchronous programming** using **Fetch API, Promises, and async/await** to handle data fetching and API integration efficiently.
- **Proficient in implementing form validation, dynamic content updates, and interactive UI components** using JavaScript.
- Practices **writing maintainable, clean, and error-free code** with proper debugging, modularity, and best practices.

React JS

- **Developed reusable and dynamic UI components using React.js to build efficient and maintainable web applications.**
- **Managed state effectively with React hooks (useState, useEffect, useContext)** for responsive and interactive interfaces.
- **Implemented routing with React Router** to create smooth, single-page application navigation.
- **Integrated APIs and handled asynchronous data** using Fetch, Axios, and Promises within React components.

Projects

News Monkey – Live News Application

Dec 2024

- Built a **React.js** application that fetches and displays live news headlines using an external **news API** with efficient component-level state management.
- Added **fallback images** for articles without visuals to ensure a consistent and polished user experience.
- Designed a **responsive, user-friendly UI** using **Bootstrap**, featuring components like **NavBar** and **NewsItem**.

TextUtil Application

Jan 2025

- **Developed TextUtil, a React.js application offering tools for word count, character count, text transformation, reversal, replacement, and whitespace removal**, providing versatile text manipulation features.
- **Implemented a responsive and user-friendly interface with light and dark modes**, ensuring smooth navigation through a React Router-powered navigation bar.
- **Enabled real-time updates and cross-browser compatibility**, delivering a seamless experience for writers, students, and professionals on various devices.
