PROFESSIONAL EXPERIENCE

Frontend Developer Intern, *Oasis Ascend*

12/2025 – 03/2026

Srinagar, India

- Collaborated closely with designers to ensure their Figma visions were accurately captured in the final React implementation, maintaining high standards for visual consistency.
- Focused on **responsive UI development** for clinical and service based platforms, ensuring a smooth experience for mobile and desktop users.
- Optimized frontend performance by building **reusable UI elements** that simplified the codebase.

Frontend Developer Intern, *IamMaturity*

07/2025 – 09/2025

Remote

- Connected the React frontend to the backend using **APIs** to move data smoothly between the UI and the MongoDB database.
- Collaborated in an **Agile environment** with backend engineers to troubleshoot and resolve data integration issues.
- Enhanced **code maintainability** by implementing a modular, component based architecture in React.js.

PROJECTS

Hotel Room Booking using MERN Stack

- **Developed a full stack booking platform** where users can browse available hotel rooms and make reservations for specific dates.
- **Built a secure login system** using **Google Authentication** and standard email/password login with **OTP verification** to ensure users are real.
- **Created a real time availability checker** that prevents double bookings; if a room is already taken for selected dates, the system alerts the user immediately.
- **Handled data security** by using **password hashing** (making passwords unreadable in the database) and **session storage** to keep users logged in safely while they browse.
- **Managed the backend** using Node.js and Express to handle room data, bookings, and user accounts stored in a MongoDB database.
- **Designed a responsive frontend** using React and Tailwind CSS so the website works smoothly on both mobile phones and laptops.

SKILLS

HTML, CSS, JavaScript, Tailwind CSS,
React.js, Node.js, Express.js, MongoDB

EDUCATION

B.Tech in Computer Science, *University of Kashmir*
