INTERNSHIP

Web Development Intern — VJS Magical Recipes

Developed a web-based application showcasing famous food items from every district, including their speciality, preparation methods, and location details. The project was designed to provide users with information about traditional dishes and their cultural importance in different regions.

Project Features:

- Displayed district-wise famous food items with their speciality and cultural background.
- Added detailed recipe preparation methods and ingredient information.
- Integrated district location details and map-based references for easy navigation.
- Designed responsive and user-friendly web pages for better user experience.
- Implemented database storage for recipes and district information.

- Created an attractive frontend using Bootstrap and custom CSS styling.

Technologies Used: HTML, CSS, Bootstrap, JavaScript, SQL/MySQL Database

PROJECTS

District Food Speciality Web Application

A dynamic web application developed to showcase famous food items from different districts along with their speciality, preparation process, ingredients, and geographical locations. The project aimed to preserve and promote regional food culture through an interactive platform.

Responsibilities & Key Contributions:

- Developed the frontend using HTML, CSS, Bootstrap, and JavaScript for responsive design.
- Created interactive pages to display district-wise food categories and recipe details.
- Used SQL/MySQL database to store food item information, district data, and preparation methods.
- Implemented structured database connectivity for efficient data handling.
- Designed a clean and user-friendly interface with attractive layouts and navigation.
- Enhanced user experience through responsive web design and organized content presentation.
