

ADITYA VERMA

PHP & Laravel Developer | REST API Development | MySQL | Web Applications
Lucknow, India | +91 8299652187 | adityaverma6300@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Passionate PHP & Laravel Developer with hands-on internship experience delivering production-ready web applications from scratch. Skilled in building secure RESTful APIs, designing normalized MySQL databases, and applying MVC architecture to write clean, maintainable code. Comfortable working across the full backend lifecycle — from schema design and business logic to API integration and deployment — using tools like Git, Postman, and Docker. Currently completing a B.Tech in Computer Science (AKTU, SGPA 8.11) and actively seeking a full-time developer role where I can ship real features, grow fast, and contribute to a high-performing engineering team.

TECHNICAL SKILLS

Languages: PHP, JavaScript, HTML5, CSS3
Frameworks & CMS: Laravel, WordPress, Bootstrap 5
Database: MySQL (schema design, indexing, joins, complex queries)
APIs & Concepts: REST API, CRUD, MVC, AJAX, jQuery, Authentication & Authorization, CSRF Protection
Version Control: Git, GitHub (branching, pull requests, code review)
Tools: VS Code, Sublime Text, WAMP Server, Postman (API testing)

PROFESSIONAL EXPERIENCE

PHP Developer Intern — SoftPro India Pvt. Ltd., Lucknow *Sep 2025 – Mar 2026*

- Developed dynamic web applications using PHP & Laravel, following MVC architecture for clean, maintainable codebases.
- Designed and integrated RESTful APIs consumed by front-end components, enabling modular and scalable application structure.
- Built secure authentication systems (registration, login, password reset) with session management and CSRF protection.
- Designed normalized MySQL database schemas and wrote complex queries including joins and aggregations to support application logic.
- Collaborated via Git/GitHub — participated in code reviews, maintained branches, and resolved merge conflicts.

KEY PROJECTS

E-Commerce Website | PHP, MySQL

- Built product catalog with category filtering, search, and session-based cart; implemented secure user auth and admin panel for product/order management.

Blog Platform — PHP, MySQL

- Developed a multi-user blogging system with complete CRUD operations, role-based access control, and comment moderation.
- Implemented slug-based URL routing and pagination for improved UX and SEO readiness.

Restaurant Management System | PHP, MySQL

- Developed table-wise ordering, real-time kitchen queue display, and billing module with normalized DB schema supporting concurrent orders.

Travel Booking Website | PHP, MySQL

- Built dynamic package listing with date-based availability checks, booking confirmation flow, and email notification on submission.

UI Clone Projects — HTML, CSS, Bootstrap, JavaScript

- Recreated responsive front-end interfaces for YouTube, Myntra, a college portal, and a hotel landing page — demonstrating strong UI/UX skills and attention to pixel-level detail.

EDUCATION

B.Tech – Computer Science & Engineering Seth Vishambhar Nath Institute (AKTU Affiliated) CGPA : 7.13	[2026]
Intermediate (Class XII) Subhagi Inter College	[2019]
High School (Class X) Subhagi Inter College	[2017]

CORE COMPETENCIES

Problem Solving • Fast Learner • Clean Code Practices • Team Collaboration • Adaptability • Attention to Detail
